My 5 Year Climate Action Plan Jim Lichti San Francisco, CA 1-27-23

Locally

- Being able to speak and understand Spanish comfortably
- Make sure that Proposition M (vacancy tax that will fund rent subsidies and) is being implemented properly
- Working with **Faith in Action Bay Area** both locally and **California Pico** statewide, promoting legislation on low-income housing
- Also with Faith in Action, pursuing possible implementation of UBI or policies along those lines
- Continue work with Climate Action Group in my Mennonite congregation
- Watch for opportunities to embrace local measures promoting localization

Nationally

- Turn as many Mennonite congregations as possible into radical climate activists, perhaps working more closely with the Mennonite Creation Care Network
- Support all efforts of the Dismantling the Doctrine of Discovery Doctrine such as the Apache Stronghold efforts in Arizona
- Continue work with publications for Mennonite and non-Mennonite audiences coming of our congregation's Climate Action Group

Internationally

 Continue to help raise money for and spread awareness of the work of Health in Harmony in Indonesia, Brazil, and Mozambique and also Dismantling the Doctrine of Discovery's international efforts

In RC

- Possibly back up the work of SAL as a typist or with tech (when possible)
- Review my five-year plan every six months
- Support local work on the Climate when possible
- Consistently work on chronic material that limits my abilities to take full leadership

Personally

- Have an extended network of relationships with people in San Francisco from different backgrounds, income levels, etc.
- Take care of my health
- Continue with podcasts on the climate (Nate Hagens, Planet Critical) that have proved useful, and continue with the two Climate related reading groups in my congregation
- Continue to work on not hiding RC
- Use our car minimally, use the excellent public transit network at my disposal whenever possible, do not buy a new car (unless required to locate)
- Reduce meat consumption by 3/4, continue buying local of everything whenever possible, suppress inclinations toward consumerism
